## ExtendSim Suite

Adds a next generation 3D animation capability to ExtendSim AT, providing a three-dimensional representation of the world of the model. The 3D environment is independent of, but integrated with, the logical model. 3D animation can run concurrently or be buffered.

## ExtendSim AT

Designed for modeling and analysis of complex systems. Adds advanced discrete event and discrete rate technology to ExtendSim OR, including a Scenario Manager, Advanced Resource Management, distribution fitting, rate-based module, and other advanced analysis tools.

## ExtendSim OR

The essential tool for researching operational performance. Builds on the core set of simulation power in ExtendSim CP plus adds a message-based discrete event architecture and capabilities. Use it to track and analyze the behavior of physical or logical entities when events cause them to change state or move through a system.

## ExtendSim CP

Our base product and the cornerstone of the ExtendSim family of simulation tools. It has a set of core features that are included in all ExtendSim products, plus specialized constructs for modeling continuous processes.

## Additional Information

- ☞ A complete list of features is available at [www.ExtendSim.com](http://www.ExtendSim.com).
- ☞ If purchasing in quantities of 10 or more, contact Imagine That Inc. for quantity discounts. To be eligible for discount pricing, all licenses must be purchased at the same time, be on the same purchase order, and be shipped to the same address.
- ☞ Shipping charges will be added to your order. California residents add appropriate sales tax.
- ☞ Prices are only available directly from Imagine That Inc. and are subject to change without notice. Prices may differ outside the USA, Canada, & Mexico. Export to other countries is prohibited.

## LICENSE TYPES AND SUPPORT PLANS

### Single User, Stand Alone License

- Designed to be utilized by a single user on a single computer. The user is also granted the right to install ExtendSim on a portable or home computer, provided the computers are not used simultaneously.
- Includes printed User Guide and Addendum in addition to electronic versions of the User Guide, Addendum, and Developer Reference.

### Networked, Concurrent Licenses

- Allows a specified number of concurrent users in a network.
- A single central server must be used as the License Server.
- The ExtendSim Network License includes license management software that automatically maintains the number of concurrent users to the maximum permitted by individual License Agreement.
- Remote or mobile users may export or "check out" a license from the network for off-line usage (such as for a laptop taken off site) while maintaining adherence to the ExtendSim License Agreement.
- A Network License must be installed and used within a single, specified country. Use over the internet is prohibited.

### ExtendSim LT

- Limited version of ExtendSim Suite that allows you to:
- Run models of any size for an unlimited time
  - Enter or import parameter values into a model
  - View and export results
  - See animation in the model, if the model includes that feature
  - Build small models (up to 75 blocks)
  - Save changes to models plus print models, dialogs, and so forth
  - ExtendSim LT includes the eTextbook *ExtendSim for Discrete Event System Simulation*.

### Support

After a 60 day complimentary support period, Technical Support is available for registered ExtendSim users either under an annual Maintenance Plan or on a Per-Incident basis.

#### Maintenance Plan

**Network Licenses --** A Maintenance Plan for support and upgrades is *required*. The first year, Maintenance is included; it must then be renewed annually at 20% of the cost of a then-current license at the time of renewal. The Maintenance Plan covers basic usage questions and troubleshooting as well as upgrades to major releases.

**Single User Licenses --** A Maintenance Plan for support and upgrades is *optional*, but highly recommended. The Maintenance Plan covers basic usage questions and troubleshooting as well as upgrades to major releases. Maintenance can only be purchased within 60 days of purchasing a new license or upgrading.

**Single User and Network Licenses --** In addition to support and upgrades, the Maintenance Plan provides discounts on special ExtendSim webinars and trainings as well as first looks at upcoming products and features.

#### Per-Incident Support (for single user licenses only)

For usage questions and troubleshooting after the first 60 days, support may be purchased on a per-incident basis; each incident is a discussion and resolution of one issue. Per-Incident Support is available for purchase through the ExtendSim Store.
