ExtendSim Suite

Adds a next generation 3D animation capability to ExtendSim AT, providing a three-dimensional representation of the world of the model. The 3D environment is independent of, but integrated with, the logical model. 3D animation can run concurrently or be buffered.

ExtendSim AT

Our advanced technology product, ExtendSim AT features a rate-based functionality for modeling bulk systems, such as packaging lines, chemical processes, or network traffic. Use it to specify rates of flow for any high volume or high speed system, then delay and route the flow using constraints and rules. Includes an Add-In for editing an ExtendSim database in Excel plus Geer Mountain's Stat::Fit for distribution fitting.

ExtendSim OR

The essential tool for researching operational performance. Features a message-based discrete event architecture and capabilities. Used to track and analyze the behavior of physical or logical entities when events cause them to change state or move through a system.

ExtendSim CP

Our base product and the cornerstone of the ExtendSim family of simulation tools. It has a set of core features that are included in all ExtendSim products, plus specialized constructs for modeling continuous processes.

Additional Information

- ☞ A signed letter on university letterhead stating ExtendSim will be used by a professor teaching a course, a student using the software in that course, or a student using ExtendSim for research toward an advanced degree must be submitted with your order to qualify for this type of discount.
- ☞ Discount pricing is not available if license will be used for consulting.
- ☞ Imagine That Inc. reserves the right to determine whether license use qualifies for the discount.
- ☞ Shipping charges will be added to your order. California residents add appropriate sales tax.
- ☞ Prices are only available directly from Imagine That Inc. and are subject to change without notice. Prices may vary outside the US, Canada, & Mexico.
- ☞ Export restrictions apply. Please see www.extendssim.com or contact Imagine That Inc. for a list of global resellers.

LICENSE AND SUBSCRIPTION DESCRIPTIONS

Single User, Stand Alone License

Installed on a single computer.

- Designed to be utilized by a single user on a single computer. The user is also granted the right to install ExtendSim on a portable or home computer, provided the computers are not used simultaneously.
- Includes one set of manuals for each license.
- Access to technical support is provided to all registered users at no charge for the first 60 days after purchase. Upgrades to new versions are fee-based unless you opt for the Maintenance Subscription, below.

Maintenance Subscription For Single User, Stand Alone Licenses

The ExtendSim Maintenance Subscription is the solution for ExtendSim customers who:

- Have a single-user, stand-alone license.
- Want a cost-effective method to keep their ExtendSim single user licenses current.
- Prefer the convenience of budgeting for an annual payment.

You have the option to purchase an ExtendSim Maintenance Subscription when you purchase or upgrade ExtendSim (single user licenses only). Major upgrades (whole number version changes) released during your maintenance year will automatically be shipped to you. You will be invoiced annually to renew the Subscription so that you can continue receiving regular upgrades.

ExtendSim Lab License Local Area Network License of ExtendSim Suite

- Priced per station. Minimum purchase is 5 stations.
- ExtendSim Lab Licenses allow a specified number of locally networked users to access the full version of ExtendSim concurrently. One license may be installed on the instructor's computer.
- The Lab License is subject to an annual renewal fee of \$25/station (maximum \$500). The renewal fee is due on the anniversary date of purchase. Renewal entitles the lab to continued technical support and upgrades.
- Online documentation is included. Printed manuals may be purchased separately.

LT - RunTime License LT/RT version

The LT-RunTime version of ExtendSim Suite allows you to:

- Run models of any size for an unlimited time
- Enter or import parameter values into a model
- See and export results
- See animation in the model, if the model includes that feature
- Build small models for a limited time (up to 75 blocks for up to 180 days)
- Save changes (except to models that are locked)
- Print models, dialogs, and so forth

* If your university owns a current Lab License, all students are eligible to download the ExtendSim LT-RunTime from the ExtendSim Store for \$50. Contact Imagine That Inc. for your discount coupon code.
